Professional Summary

I am a computer engineer specializing in operating systems research, with a focus on optimizing them for networking workloads. I am currently pursuing a PhD at Politecnico di Milano under the supervision of *Prof. Gianni Antichi*. My work centers on projects at the intersection of operating systems and programmable hardware. I enjoy learning new concepts and applying them in practice, particularly in collaborative environments.

Education

2025 - exp. 2028	Politecnico di Milano , Milan, Italy <i>Ph.D. in Information Technology, Telecommunication</i> Advised by Prof. Gianni Antichi.
2022 - 2025	Politecnico di Milano , Milan, Italy <i>M.S. in Computer Engineering</i> Cum Laude
02/2023 - 07/2023	IT University of Copenhagen , Copenhagen, Denmark <i>Semester Abroad (Erasmus) - M.S. in Computer Engineering</i>
2019 - 2022	Politecnico di Milano , Milan, Italy <i>B.S. in Computer Engineering</i>

Professional Experience

05/2025 - 09/2025	Politecnico di Milano <i>Research Assistant</i> I implemented and evaluated the performance of the AF_XDP Zero Copy path on the OpenNIC platform, a open source SmartNIC design for Xilinx FPGAs. All of this work is open-source with part of it upstreamed in the Xilinx repository. I worked under the supervision of Prof. Gianni Antichi.
09/2018 - 02/2020	Radio Popolare <i>Radio Host</i> I did both live radio hosting and editorial work for a program called "Mind The Gap". Me and other peers explored what it means to be 20 years old in today's society. The program ranged from music, politics, sexuality and lifestyle. I authored and hosted various original segments about Internet Culture and interviews with experts, musicians and even the Ministry of Education of the time. We were on-air from October 2018 to March 2020.

Publications

- Farbod Shahinfar, **Marco Molè**, Aurojit Panda, and Gianni Antichi. *Don't Stall Me Now. Hiding Memory Stall in eBPF*. To appear in ACM SIGCOMM, 2026.
- Marco Molè**, Farbod Shahinfar, Francesco Maria Tranquillo, Davide Zoni, Aurojit Panda, and Gianni Antichi. *Performance Implications at the Intersection of AF_XDP and Programmable NICs*. In ACM SIGCOMM Workshop on eBPF and Kernel Extensions (eBPF), 2025.

Teaching Experience

- | | |
|------|---|
| 2024 | <p>Software Engineering I, Politecnico di Milano
<i>Professor:</i> Prof. Alessandro Margara
I reviewed and tutored Bachelor's Students on their final year project.
The students were tasked in building a multiplayer tabletop-like game in Java, with server/client functionality, GUI and unit testing.</p> |
| 2024 | <p>Introduction to Programming, Politecnico di Milano
<i>Professor:</i> Prof. Elisabetta Di Nitto
Provided tutoring and academic support to first-year engineering students in programming fundamentals, with a focus on C and MATLAB. Assisted students in developing problem-solving skills and understanding core computational concepts.</p> |

Honors & Scholarships

- | | |
|-----------|--|
| 2019 | <p>Best Freshmen Award, Politecnico di Milano
Given to the 200 best freshmen (top 3%) in the academic year 2019/2020.</p> |
| 2022-2025 | <p>Merit-Based Scholarship, Politecnico di Milano
50% second and third year fees for students with a GPA higher than 27/30.</p> |
